MEMORANDUM FOR:

THROUGH :

SUBJECT : Military Inputs for OER GNP Calculations

1. Attached are the figures for Military Machinery and Military Personnel for the years 1950-1974, broken down by various categories. As was discussed previously, the Military Machinery figures include 80 percent of civilian personnel and the remaining 20 percent are included in the Military Personnel figures. All R&D was subtracted from the Military Machinery figure.

2. The Military personnel figures include only active duty pay. Retiree pay has been subtracted from the total, and food and clothing have been included as separate entries. All items with the exception of clothing are directly available from OSR BEST-74 estimates. The clothing estimates were derived by multiplying estimated Soviet active military manpower times average clothing allowances established in 1965. The figures for 1950 are not contained in the OSR BEST-74. They were generated using an older run and linked by indexes to be comparable with the remaining numbers. All numbers are in billions of 1970 rubles. If there are any questions, please contact
